Objective

Laravel Full Stack Developer with 3+ years of experience building web applications, APIs, admin panels, and CRM systems. Experienced in working directly with international clients and CTOs. Strong in backend development, database design, and performance-focused solutions. Comfortable handling full project ownership, from requirement gathering to deployment. Good communication skills in English, Hindi, and Gujarati.

Skills

- Backend Development •Laravel (REST APIs, Service, Queues, Jobs, Events, Scheduling, Middleware)
- Frontend Development •HTML5, CSS3, JavaScript (ES6+), jQuery, Bootstrap •Basic knowledge of React.js
- Database •MySQL (schema design, optimization, complex queries)
- Version Control & DevOps •Git (branching, collaboration, code management)
- Performance & Security •Cloudflare (basic WAF rule configuration)
- SEO •On-page SEO, meta tags, performance optimization

Experience

- **Stafflense Pvt Ltd**   Apr 2025 -
  Full Stack
  Worked as the only in-office developer, handling complete frontend and backend development. Built scalable products for a UK-based recruitment business, with focus on CRM and SaaS-ready systems.

  Responsibilities & Contributions
   • Managed complete development lifecycle independently
   • Worked closely with UK stakeholders on requirements and improvements
   • Built systems designed to be reused and sold as SaaS products
   • Handled database design, roles, permissions, and business logic

- **Selecto India Pvt Ltd**   Dec 2023 - Jan 2025
  Full Stack
  Worked directly with the Denmark-based CTO as the sole developer for the CRM.
   • Owned CRM development and feature updates
   • Maintained tools integrated with Magento stores
   • Improved performance and UI (Hyvä theme)
   • Integrated GitHub and Cloudflare APIs
   • Managed Jenkins jobs and deployments

- **Vacuity**   Oct 2022 - Oct 2023
  Senior Developer
  Worked on multiple client projects using Laravel
   • Led backend development in a small team
   • Ensured timely delivery and clean code

- **Wooper Infotech**   Oct 2021 - Sep 2022
  Laravel Developer
   • Received professional Laravel training

- Worked on client projects with senior developers
- Built APIs and backend modules using Laravel & MySQL

Education

- **VNSGU** 2022
  BCA
  9.06

Projects

- **RivetCare (SaaS CRM Platform)**

  A UK-based recruitment CRM designed to manage candidates, clients, compliance, and workforce shift allocations.
  - Implemented multi-role & permission-based access control
  - Built a compliance engine to validate candidates based on documents, rules, and recruitment criteria
  - Designed and developed an advanced PDF-to-form feature:
  - Convert PDFs into fillable forms
  - Auto-map submitted form data back into PDFs
  - Generate completed, downloadable compliance documents
  - Ensured system scalability, data integrity, and usability for non-technical users
- **Job Portal Platform**

  A recruitment portal allowing clients to post jobs and candidates to apply online.
  - Developed job posting and application workflows
  - Enabled client-side job management and candidate applications
  - Integrated backend logic to connect job data with the CRM system
- **Connect2 – Selecto**
  - Managed and enhanced Laravel-based admin panel
  - Integrated Cloudflare and GitHub APIs
  - Improved performance and module version control
- **Community Module – Selecto**
  - Built Laravel APIs for Magento integration
  - Created community features via Connect2 platform
  - Updated API documentation using Scribe
- **Towbly – UK-Based Transport App**
  - Developed complete backend APIs
  - Implemented rider location logic (latitude/longitude)
  - Managed customers, drivers, and vehicles
- **Piko Dating App APIs**
  - Developed REST APIs using Laravel & MySQL
  - Worked closely with team using Figma designs
- **Leanr – Health Platform (USA)**
  - Built meal and workout scheduling modules
  - Managed day-wise plans and dynamic content
- **anshu.fun (Personal)**

  A personal game-based entertainment platform featuring multiple strategy and brain-training games.
  - Developed multiple browser-based games
  - Built a Business Tycoon strategy game with level unlocking and decision-based progression
  - Designed game logic focused on planning, resource management, and progression systems
- **snippetone.com**

  A personal data utility platform designed for storing and fetching user data from anywhere.
  - Built a secure platform for data storage and retrieval
  - Focused on usability, accessibility, and performance
  - Designed with real-world utility use cases in mind
